Peran SL (new)

Product sheet

Product description
Peran SL is a self-smoothing, coloured 3-component epoxy-based floor coating.

Uses
Peran SL is used to protect concrete where requirements have been set for improved durability to withstand both mechanical and chemical stress. The finished surface becomes smooth, impermeable, and easy to clean. Peran SL is a self-levelling system applied in coats of 1.5 - 3 mm.

Environment & Health
Peran SL is a solvent and nonylphenol free product, and practically odourless. Follow the appropriate Occupational Health and Safety guidelines applicable to the location where the application is undertaken. For more information, please refer to the safety datasheets for the individual components.

Ratio of components
3.3 parts of component A are mixed with 1 part of component B, and 4.1 parts of component C by weight.
2.3 parts of component A are mixed with 1 part of component B, and 1.6 parts of component C by volume.

Add all of Hardener B to Base A and mix before adding Filler C. Ensure that all Filler C is mixed in from the sides of the container and fully dispersed throughout the mix. Mix with slow speed drill and helical spinner, taking care not to entrain air.

Application temperature
The recommended substrate temperature is 15-25°C, but no less than 10°C. The temperature of the substrate should exceed the "dew point" by 3°C during application and hardening. Temperatures should not fall below 5°C in the 24 hrs after application.

Application time/pot life
Ready-mixed product should be used within 30 minutes at a temperature of 18°C. At higher temperatures the application time is shorter.

Curing time (20°C)
Can be walked on after 24 hours. The product is fully hardened after 5-7 days. High humidity in the early stages of cure can result in white, matt surfaces (blooming). Do not cover or wash within the first 24 hours of curing.

Colours
See the System data sheet for Peran SL.
Solids content
Approx. 100 %

Finish
Gloss

Density
Component A approx. 1.46 kg/l.
Component B approx. 1.05 kg/l.
Component C approx. 2.65 kg/l.
A+B approx. 1.33 kg/l.
A+B+C approx. 1.75 kg/l.

Storage
12 months in unopened pack at a temperature of 5-40°C.
Protect from weather and moisture/contaminant ingress.

Packaging
The product is delivered A+B+C in the following packs :-

<table>
